

INTAO
PEOPLE MATTER

The next step in developing your leaders.

Improving and enhancing leadership development

We have all known for a long time that the concept of isolated trainings is not optimal. People (and also organizations) do not change overnight.

The challenges:

How can we give every leader and manager exactly what he or she needs?

How can we - instead of holding isolated training sessions - implement sustainable learning processes?

How can we support and accompany our learners better without making it more costly?

The Leadership Journey: a learning subscription

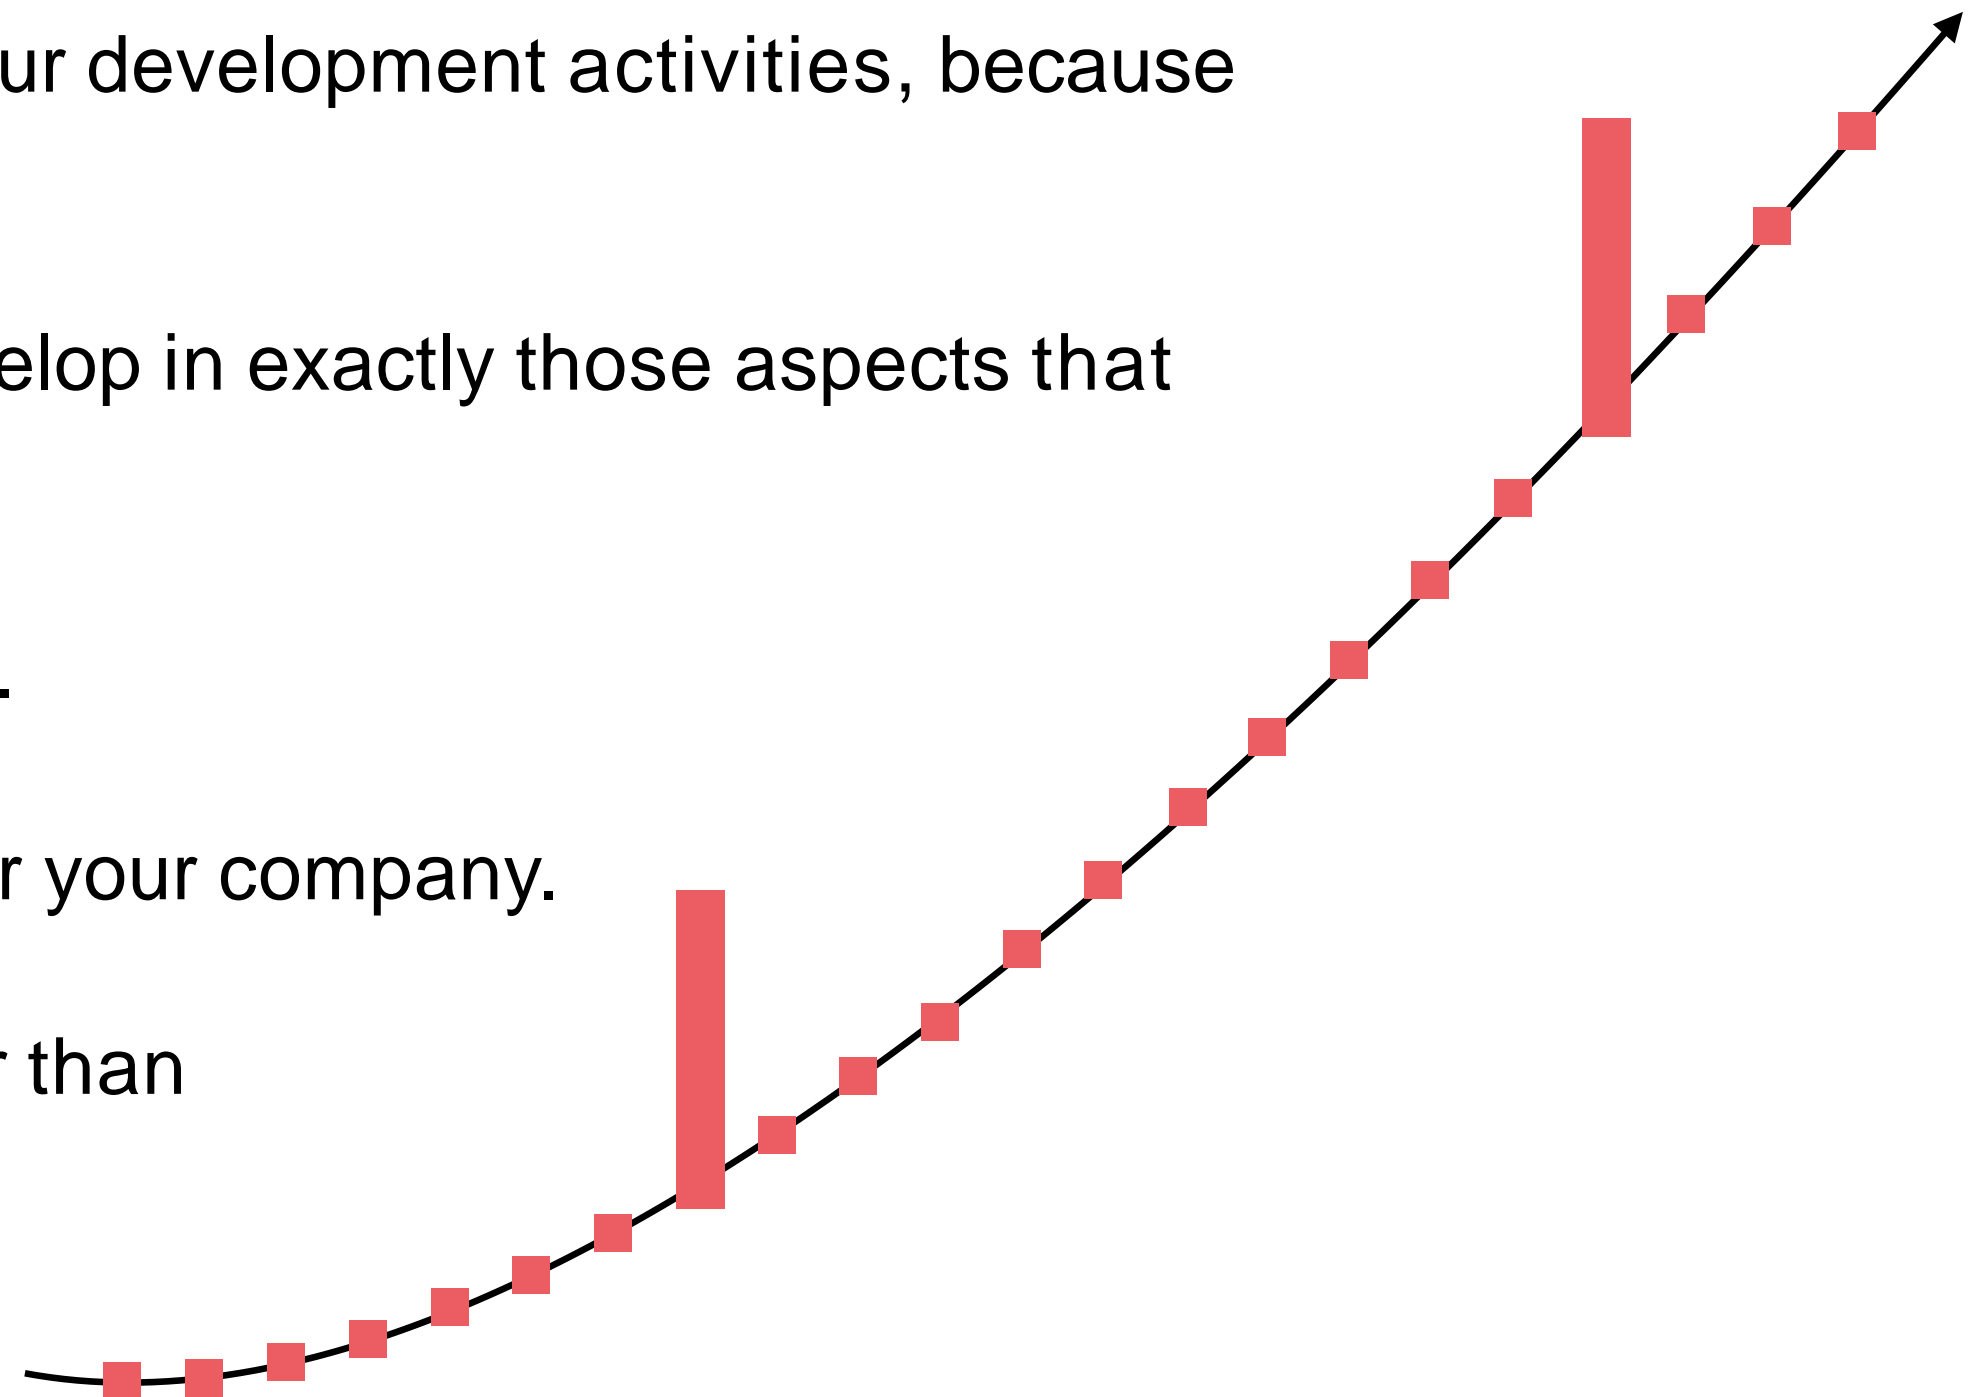

Intao is the perfect complement to all your development activities, because we turn learning into a journey.

Give your leaders the opportunity to develop in exactly those aspects that they particularly need.

Simple, self-directed and with little fuss.

As single subscriptions or customised for your company.

More effective and at least 70% cheaper than analogous seminars.

The success principle

Strong impulses set in highly interactive masterclasses led by experts.
Combined with daily nudges via Intao.
The app for lasting impact.

The topics

Our topics were all identified in exploration and dialogue with corporate leaders, managers and HR & OD specialists, and developed with experts and thought leaders.

They cover today's most important leadership tasks, roles and competencies, such as entrepreneurial thinking, coaching competence and growth mindset.

Today you have over 40 topics to choose from ([see catalogue](#)).

Entrepreneurial Thinking

Decision Making

Building Trust

Coaching Basics

Empathy

Remote & Virtual Leadership

Leader as Coach

Emotional Intelligence

Leading Change

Building Winning Teams

Feedback & Forward

Self-care

Growth Mindset

Listening

Comfortable with Complexity

Awareness

Conflict Resolution

Responsibility & Initiative

Our experts

All our experts have one thing in common: they see opportunity in a fast changing working world.

They support companies, leaders and managers in putting people at the center of digitisation.

They are all long-standing experts in the areas of leadership, communication and transformation and know the demands of the new working world.

The app

Intao is based on the latest findings in behavioural economics:

The Nudge Concept - awarded the Nobel Prize* - is 8 times more effective than traditional e-learning and explicitly revolves around the question:

How do people change?

When you want to achieve even more...
